

Bio-Energy Card

What is Far-Infrared Rays?

Far-infrared rays are part of the sunlight spectrum which is invisible to the naked eye. It also known as Biogenetic ray (between 6 to 14 microns). Biogenetics rays have been proven by scientists to promote the growth and health of living cells especially in plants, animals and human beings.

What is the effect of Far-Infrared rays?

FIR cause resonance with water molecules,. It ionizes and activates water molecules in our cells and blood thus improving our blood circulation and health condition. The human body contains more that 70% of water by weight.

What is the effect of Far-Infra-red rays on our human body?

Activates water molecules in our body. Improve oxygen level in our body. Warming and eliminating fats, chemicals and toxins from our blood and thus smoothening the flow of blood. Elimination of waste from the body, reducing the acidic level in our body & improving the nervous system.

How to display Bio-Energy Card on our body?

Sticking is not necessary. Just store in your pocket or as for ladies just slip in your bra.

Why Bio Energy card and not flexible?

The cards are patterned for the convenience of the consumers with high effect. It's scientifically proven as instant remedy to the consumer. Quality wise it's competitively good as the energy pendant, bracelet and the magnetic chain found in the market. We are proud to present the Bio-Energy Card for free to our agent's, mainly we believe Health are the supreme value then your wealth.

EFFECTS OF NEGATIVE IONS

1. DIRECT EFFECTS OF NEGATIVE ION ON HUMAN HEALTH

Activate cells: through cell membrane, it promote exchange of calcium and natrium inside and outside membrane, and keep cell's activity.

Blood purification: through cell's activity, it promote cell metabolism, and excreted hazardous waste and toxic substances from body.

Resume fatigue: eliminate illness factors, quickly recover physical strength.

Stabilize botanic nerve system: influence botanic nerve system to obtain rirritable ability, adjust function of botanic nerve system.

Strengthen resistance capacity to disease: stabilize emotion, increase C-Ball globins content, improve quantity and quality of leukin, and boost leukin's phagocytic function to the bacteria.

Restrain tumour cell growing: influence the composition and distribution of charged particles in blood, and increase cell's activity.

Absorb and shield electromagnetic radiation. Improve allergic physique: adjust the balance of botanic nerve system, strengthen the resistance to allergen material.

2.THE MAIN PERFORMANCE OF NEGATIVE ION FOR HUMAN BODY

The influences for nervous system: enhance pallium function and brain activity, excite nerve, improve work efficiency, and improve sleep quality. Negative ion also can strength the intensity of oxidation process of brain tissue, and help brain tissue to obtain much oxygen. Influences to cardiovascular system: negative ion has obvious effects to vascular expansion, restrain cholesterol content of serum, purify blood, avoid lipid depositing on vascular wall, improve blood circulation, relieve artery vasospasm, and achieve to maintain steady blood pressure.

Negative ion has big benefits for improving cardiac function and myocardial nutrition, and is good for the rehabilitation of hypertension and vascular diseases patients.

Influences to blood system: studies proved that negative ion has function to slow blood and extend clotting time, increase the oxygen content in blood, and thus is beneficial to oxygen transmission, absorption and utilization.

To improve NK activity to damage cancer cell; restrain the happening and transfer of cancer cell.

To restrain colorless leukotriene that could cause allergy and angry state, could be used in beauty and skin treatment. For example, skin burns can be quickly cured by negative ion. Negative ion also has analgesic effect.

To prevent artery probation or peroxide lipid of liver, too much ions may cause oxidation of axunge, quick oxidation of axunge will accelerate body aging.

Remove skin waste, increase activity of the skin, has significant effect for beauty.

From above we can conclude that negative ion is closely related to human's all systems, that is, human health, therefore it is will play a obvious role in human health.

FAR INFRARED RAYS (F.I.R.)

Accelerate blood circulation:

By virtue of far infrared reaction, to increase the temperature of deep skin, expand microvascular, accelerate blood circulation, relive ferment, consolidate blood and cell metabolism, which has a great help on resume young and improve anemia.

Adjust blood pressure:

High blood pressure and arteriosclerosis are usually caused by contraction and narrow of small arteries, such as nervous system, endocrine system and Kidney. Far infrared help to expand microvascular accelerate blood circulation and reduce high blood pressure, also improve hypotension symptoms.

Improve arthralgia:

Deep penetration of far infrared can reach deep muscle joints, warm inner body, relax muscle, lead to exchange of oxygen and nutrients of microvascular system, exclude the accumulation of fatigue substances and the lactic acid and other aging wastes, and has excellent effects for eliminating turgescence as well as easing pain.

Adjust autonomic nerve:

Autonomic nerve mainly regulates visceral functions. Human are usually in the state of anxiety, autonomic nerve keep tense, which will lead to low immunity ability, headache, swimming , insomnia fatigue and cold extremities.

Reduce fattiness:

Far infrared therapy can result in energy increasing, cell activation, and thus promote adipose tissue metabolism, burning and decomposition, consumption excess fat, thereby effectively lose weight.

Strengthen liver function:

The deep heat reaction from deep body that caused by far infrared can activate cell, enhance tissue regeneration capacity and promote cell growth, strengthen the liver function of detoxification, make the body environment to maintain good physical condition, so it can be said as the best prevention strategy to illness.

Promote metabolism:

After microcirculatory system get improvement, metabolic waste can be rapidly excreted from body, the burden of liver and kidney will be reduced. Such waste includes heavy metals that can cause cancer; lactate, free fatty acids and subcutaneous fat that can cause fatigue and aging; and uranium ions that can cause hypertension.

Balance body's PH degree:

Far infrared can purify blood and improve the quality of skin, to prevent excessive uric acid that can cause bone pain and arthralgia.
